PROFILE SUMMARY

Dedicated Frontend Developer with 2+ years of hands-on experience in building scalable web applications using Angular 12+ and TypeScript. Expertise in developing responsive, high-performance user interfaces with modern frameworks including Tailwind CSS and Bootstrap. Proven ability to integrate RESTful APIs, optimize application performance, and deliver production-ready solutions. Strong foundation in component-based architecture, reactive programming with RxJS, and agile development methodologies. Passionate about writing clean, maintainable code and staying updated with latest frontend technologies.

TECHNICAL SKILLS

Frontend Technologies: Angular 12+, TypeScript, JavaScript ES6+, HTML5, CSS3, Angular Signals, Standalone Components.

UI Frameworks: Tailwind CSS, Bootstrap, Responsive Design, Mobile-First Design, CSS Grid, Flexbox.

State Management: NgRx, Angular Signals, RxJS, Subject, BehaviorSubject, Service-based State Management.

API Integration: RESTful APIs, HTTP Client, JSON, Asynchronous Programming, Error Handling.

Testing: Jest, Unit Testing, Integration Testing, Code Coverage.

Tools & Platforms: Git, GitHub, JIRA, Chrome DevTools, Visual Studio Code, Postman.

Performance Optimization: Lazy Loading, Tree Shaking, Code Splitting, Bundle Size Optimization.

Development Practices: Agile/Scrum, Code Reviews, Version Control, CI/CD, Debugging.

PROFESSIONAL EXPERIENCE

Frontend Developer

Yorosis Technologies, Coimbatore, Tamil Nadu

June 2024 – August 2026

Roles and Responsibilities:

- Developed scalable Angular applications and enterprise UI features** using Angular 12+, TypeScript, RxJS, Angular Signals, Standalone Components, and reusable component-based architecture.
- Developed CRM automation interfaces** for lead and deal-based workflows, including dynamic configuration screens, forms, and frontend integration with backend REST APIs.
- Built automation workflows for contacts, projects, tasks, and payments** implementing responsive Angular UIs and handling asynchronous API responses and error scenarios.
- Integrated Facebook and LinkedIn advertising features** by consuming backend-provided REST APIs and webhook-based communication, enabling centralized management of social media ads within the application.

- **Developed application usage and quota management interfaces** providing administrators with centralized visibility and controls to modify usage limits and reset organization-level quotas.
- **Implemented role-based access and application security** using Angular Route Guards, HTTP Interceptors, and permission-based UI controls to restrict administrative functionality.
- **Designed and developed 10–20 reusable custom Angular components** including yoro-table, yoro-card, and yoro-button, to standardize UI development and reduce migration issues during Angular upgrades.
- **Collaborated with Spring Boot and Node.js backend developers** to integrate RESTful APIs, understand API contracts, troubleshoot integration issues, and ensure reliable frontend-backend communication.
- **Worked closely with UI/UX designers to convert Figma designs and prototypes** into responsive interfaces, applying Angular Material, Tailwind CSS, Bootstrap, CSS Grid, Flexbox, and mobile-first design practices.
- **Mentored 3 junior developers and contributed to Agile/Scrum development** practices, including code reviews, Git/GitHub workflows, sprint planning, debugging, documentation, and establishing standardized Angular coding practices.

Key Achievements:

- Reduced application load times by 40% through implementation of lazy loading and performance optimization strategies.
- Achieved 98% API integration reliability through proper error handling and retry mechanisms using RxJS.
- Reduced bundle size by 45% through tree shaking and code optimization techniques.
- Decreased development time by 35% by creating reusable component library used across multiple projects.

PROJECT DETAILS

Task Flow Management System : Developed a responsive task flow management application using Angular with authentication, task CRUD, status and priority management, dashboard charts, search and filtering features. Integrated Supabase for database and data persistence, built mobile-friendly interfaces, and deployed the production application on Vercel.

EDUCATION

Bachelor of Engineering (B.E.) — Electronics and Communication Engineering

University College of Engineering, Nagercoil, Tamil Nadu
2020 – 2023

Diploma — Electronics and Communication Engineering

N.M.S. Kamaraj Polytechnic College, Pazhavilai, Tamil Nadu
2017 – 2020
